Morning Glory, the coffee shop on the corner, has lost nearly 50% of its business because a national retail coffee chain opened up a store down the street. Instead of closing up shop, the owner of Morning Glory plans to draw in customers by offering coffee, tea, and pastries at much lower prices than the national coffee chain.

The owner's plan of action is based on all of the following assumptions EXCEPT

- B.** some customers will choose the coffee shop that offers the lowest price.
- C.** Morning Glory can afford to cut its profit margin in order to lower prices.
- D.** the quality of Morning Glory's coffee is comparable to that of the national coffee chain.
- E.** the national coffee chain will not lower its prices in order to compete with Morning Glory.

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

The owner's plan - to lower prices to attract customers - assumes that some customers will choose the lower price (choice a), that the quality of Morning Glory's products is comparable to its competitor (choice b), that Morning Glory can afford to offer lower prices (choice c), and that its competitor will also not lower its prices (choice e). The plan does not rest on any assumptions about the loyalty of Morning Glory customers (choice d). Indeed, there is evidence that the customers are not loyal, because Morning Glory has already lost 50% of its business.

### NEW QUESTION: 3

Site-A and Site-B have a site-to-site VPN set up between them. OSPF is configured to dynamically create the routes between the sites. The OSPF configuration in Site-A is configured properly, but the route for the tunnel is not being established. The Site-B interfaces in the graphic are using a broadcast Link Type. The administrator has determined that the OSPF configuration in Site-B is using the wrong Link Type for one of its interfaces.

Which Link Type setting will correct the error?

- A. Set tunnel.10 to p2p
- B. Set tunnel.10 to p2mp
- C. Set ethernet1/21 to p2mp
- D. Set ethernet1/21 to p2p

**Answer: A**

Explanation:

We need to reconfigure the tunnel with the p2p link type.

Note: Link type -Choose Broadcast if you want all neighbors that are accessible through the interface to be discovered automatically by multicasting OSPF hello messages, such as an Ethernet interface. Choose p2p (point-to-point) to automatically discover the neighbor. Choose p2mp (point-to-multipoint) when neighbors must be defined manually. Defining neighbors manually is allowed only for p2mp mode.
