After you buying our exam preparation materials, **IIA-CIA-Part3-KR PDF VCE** our new version will be sent to your mailbox for you within one year after purchasing.

**NEW QUESTION: 1**
You are evaluating the name resolution for the virtual machines after the planned implementation of the Azure networking infrastructure.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.

**Answer:**
Explanation:

Statement 1: Yes
All client computers in the Paris office will be joined to an Azure AD domain.
A virtual network named Paris-VNet that will contain two subnets named Subnet1 and Subnet2.
Microsoft Windows Server Active Directory domains, can resolve DNS names between virtual networks. Automatic registration of virtual machines from a virtual network that's linked to a private zone with auto-registration enabled. Forward DNS resolution is supported across virtual networks that are linked to the private zone.
Statement 2: Yes
A virtual network named ClientResources-VNet that will contain one subnet named ClientSubnet You plan to create a private DNS zone named humongousinsurance.local and set the registration network to the ClientResources-VNet virtual network.
As this is a registration network so this will work.
Statement 3: No
Only VMs in the registration network, here the ClientResources-VNet, will be able to register hostname records. Since Subnet4 not connected to Client Resources Network thus not able to register its hostname with humongoinsurance.local

**NEW QUESTION: 2**
Your customer is using Replication Manager to make local TimeFinder/Clone backups of their Microsoft Exchange 2010 environment. The customer reconfigured the Exchange environment to place the logs on the L: drive and mount the database on L:SG1DB1. They updated the associated Replication Manager replica job to reflect the change. The customer reports that the mount of the database to the backup server now fails.
What do you advise the customer?
**A.** A separate application set must be configured for the database.
**B.** The database replica must be part of the same replica job as the logs.
**C.** Additional clone targets need to be added to the storage pool.
**D.** Nested mount points are not supported with Replication Manager.
**Answer: D**

**NEW QUESTION: 3**
次の図は、どの冗長アレイc /独立ディスク（RAID）レベルを表していますか？

**A.** RAID 10
**B.** RAID 5
**C.** RAID 0
**D.** RAID 1
**Answer: A**

**NEW QUESTION: 4**
Universal Containers has implemented a strict software architecture for their custom Apex code. One of the requirements is that all SOQL queries are contained within reusable classes. Depending on the context of the Apex transaction, the queries should be able to run either "With Sharing" or "Without Sharing". Which two ways allow the Architect to meet these requirements? Choose 2 answers
**A.** Create a SystemSOQLQueries class and a UserSOQLQueries class; set the "With Sharing" keyword on the UserSOQLQueries class and "Without Sharing" on the SystemSOQLQueries class
**B.** Create a reusable SOQLQueries class; do not specify "With" or "Without Sharing" on the SOQLQueries class (Missed)
**C.** Create a reusable SOQLQueries class; specify "With Sharing" on the methods that require user context and "Without Sharing" on the methods requiring system context
**D.** Create a reusable SOQLQueries class; do not specify "With" or "Without Sharing" on the SOQLQueries class and use the runAs () method to dynamically set the context (Missed)
**Answer: B,D**
