Our ISOIEC-LA question torrent can play a very important part in helping you achieve your dream.

NEW QUESTION: 1

次の表に示すユーザーを含むMicrosoft 365サブスクリプションがあります。

次の図に示すように、登録ステータスページプロファイルを設定します。

ポリシーをGroup1に割り当てます。
次の表に示すデバイスを購入します。

次の各ステートメントについて、ステートメントがtrueの場合は[はい]を選択します。それ以外の場合は、[いいえ]を選択します。

注：それぞれの正しい選択は1ポイントの価値があります。

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-status>

NEW QUESTION: 2

SIMULATION

Scenario: Provisioning Services has been installed to facilitate the deployment of server OS and desktop OS machines.

Currently, a pool of Windows 8 desktop OS machines is being used by the Imaging and Radiology team. A virtual

machine OU named CCH Virtual Desktops has been created. However, users on the Imaging and Radiology team need

to use their medical imaging applications that CANNOT be installed on their workstations due to insufficient resources.

As the Citrix Engineer, you have been asked to provision desktop OS machines with sufficient resources to three

Imaging and Radiology team members in order to allow them to use their new applications. All three of the desktop

OS machines should be assigned the Win8 vDisk, and the desktop OS machines should maintain changes after reboot.

Members of the Imaging and Radiology team need to be able to log into the CCH.com domain.

The Windows 8 virtual machines were already created with the following information:

CCHWin801 - IR Desktop 1

IP Address: DHCP Assigned

MAC Address: 8e:2b:59:62:34:e6

NOT a member of Active Directory

CCHWin802 - IR Desktop 2

IP Address: DHCP Assigned

MAC Address: 56:5b:b0:38:6a:54

NOT a member of Active Directory

CCHWin803 - IR Desktop 3

IP Address: DHCP Assigned

MAC Address: be:c8:96:6e:89:c9

NOT a member of Active Directory

In order to save time, a copy of an existing Windows 8 base image vDisk was created and named Win8 and is stored in the PVS StoreOI store.

As the Citrix Engineer, use the existing site, store, and device collection to implement the tasks below.

Tasks:

1. Create and configure all 3 of the Windows 8 desktop OS machines as target devices to boot using the Win8 vDisk.
2. Name the target devices CCHWin801, CCHWin802, and CCHWin803.
3. Modify the vDisk as necessary to meet the requirements outlined in the scenario.

Answer:

Explanation:

XenDesktop 7 Machine Catalog

1. Create the VM in an existing catalog

2. Choose the OS type

3. We will be using VMs and Citrix Machine Creation Services, so the defaults are fine.

4. Use the default

5. Choose the master image WIN8.vdisk

6. A great feature of XenDesktop is the ability to customize the catalog hardware at provisioning time, so you can offer

different tiers of VMs from the exact same master image. No need to build up templates with the same OS and

software stack, just to customize the vCPUs and memory specs.

7.

8. After you kick off the provisioning process you get a nice status. MCS first makes a copy of your master VM, then does its magic to create copies

NEW QUESTION: 3

What is the best way to get Cisco OnPlus up and running for a customer?

- A. Set up user licenses.
- B. Plug into a switch port.
- C. Set up a dedicated PC
- D. Install the software.

Answer: B

NEW QUESTION: 4

You have a computer that runs Windows 7.

You add a new hard disk drive to the computer and create a new NTFS partition.

You need to ensure that you can use the Previous Versions feature on the new drive.

What should you do?

- A. From System and Security, enable BitLocker Drive Encryption (BitLocker).
- B. From Disk Management, convert the new disk to a dynamic disk.
- C. From System Properties, configure the System Protection settings.
- D. From the properties of the new drive, create a share and modify the caching settings.

Answer: C

Explanation:

System protection might not be turned on for the drive. If system protection is not turned on, Windows can't create previous versions. To turn on system protection:

1. Click to open System.
2. In the left pane, click System protection. If you're prompted for an administrator password or confirmation, type the password or provide confirmation.
3. Click the drive, and then click Configure.
4. Click Restore system settings and previous versions of files, and then click OK.
