NEW QUESTION: 2

A system administrator in a bank was asked by business users to determine the most accessed

JSP page in a web application at normal work load for marketing purpose.
Which tool should the administrator use to find the most used JSP page?

- A. Tivoli Performance Viewer (TPV) summary reports
- B. IBM Support Assistant Data Collector
- C. High Performance Extensible Logging Log Viewer
- D. Performance and Diagnostic Advisor

Answer: A

Explanation:

Explanation/Reference:

Summary reports are available for each application server.

Tivoli Performance Viewer provides the following summary reports for each application server:
The servlet summary lists all servlets that are running in the current application server. Use the servlet summary view to quickly find the servlet that consumes the most time and the applications that use them, and to determine which servlets are invoked most often.
Etc.
