NEW QUESTION: 1

Which of the following is NOT an integral part of VPN communication within a network?

- A. VPN trust entities
- B. VPN key
- C. VPN domain
- D. VPN community

Answer: B

NEW QUESTION: 2

Which two statements about SAN zoning on Cisco Nexus switches are true? (Choose two.)

- A. A zone can only be a member one zone set.
- B. Zone configuration changes are nondisruptive.
- C. Zoning is enforced by examining the destination ID field.
- D. Only one zone set can be activated at any time.
- E. Zoning must be administered from the primary SAN switch in the fabric.
- F. Devices can only belong to one zone.

Answer: B,D

Explanation:

Explanation

A zone set can be activated or deactivated as a single entity across all switches in the fabric. Only one zone set can be activated at any time. If zoning is not activated, all devices are members of the default zone. If zoning is activated, any device that is not in an active zone (a zone that is part of an active zone set) is a member of the default zone. Zoning can be administered from any switch in the fabric. When you activate a zone (from any switch), all switches in the fabric receive the active zone set. Additionally, full zone sets are distributed to all switches in the fabric, if this feature is enabled in the source switch.
