NEW QUESTION: 1

AWSで大規模な機密文書Webサーバーを構築しており、その文書はすべてS3に保存されます。要件の1つは、S3から直接パブリックにアクセスできないことであり、これを実現するにはCloudFrontを使用する必要があります。以下にリストされている方法のうち、どれが概説されている要件を満たしますか？以下のオプションから回答を選択してください：

A. CloudFrontのIdentity and Access

Management (IAM) ユーザーを作成し、S3バケット内のオブジェクトへのアクセスをそのIAMユーザーに付与します。

B.

プリンシパルとしてCloudFrontディストリビューションIDを、Amazonリソースネーム (ARN) としてターゲットバケットをリストするS3バケットポリシーを作成します。

C. CloudFrontのOrigin Access

Identity (OAI) を作成し、S3バケット内のオブジェクトへのアクセスをそのOAIに許可します。

D.

ドキュメントが保存されるバケットごとに個別のポリシーを作成し、そのポリシーにCloudFrontのみへのアクセスを許可します。

Answer: C

Explanation:

Explanation

If you want to use CloudFront signed URLs or signed cookies to provide access to objects in your Amazon S3 bucket you probably also want to prevent users from accessing your Amazon S3 objects using Amazon S3 URLs. If users access your objects directly in Amazon S3, they bypass the controls provided by CloudFront signed URLs or signed cookies, for example, control over the date and time that a user can no longer access your content and control over which IP addresses can be used to access content. In addition, if user's access objects both

through CloudFront and directly by using Amazon S3 URLs, CloudFront access logs are less useful because they're incomplete.

Option A is invalid because you need to create an Origin Access Identity for CloudFront and not an IAM user. Option C and D are invalid because using policies will not help fulfill the requirement. For more information on Origin Access Identity please see the below link: <http://docs.aws.amazon.com/AmazonCloudFront/latest/DeveloperGuide/private-content-restrictive-access-to-s3>.

The correct answer is: Create an Origin Access Identity (OAI) for CloudFront and grant access to the objects in your S3 bucket to that OAI.

NEW QUESTION: 2

You want to migrate an Oracle Database 11.2.0.2 on-premises database to the Oracle Database 11g database of the Database as a Service (DBaaS) instance on Oracle Cloud. A subset of the data that you want to transfer includes data stored in LONG data type columns.

All required data is contained in a dedicated tablespace. The tablespace is 100 GB in size and has 20% free space.

The client wants the data migrated in the shortest possible time to minimize impact on end users.

Select the most appropriate migration method to meet this requirement.

- A. Remote Cloning
- B. Data Pump TTS
- C. Data Pump TDB
- D. SQL *Loader Direct Path
- E. conventional export/import

Answer: B

Explanation:

The Data Pump Transportable Tablespace can be used only if the on-premises platform is little endian, and the database character sets of your on-premises database and Oracle Database Cloud Service database are compatible.

The Transportable Tablespace method is generally much faster than a conventional export/import of the same data because the data files containing all of the actual data are simply copied to the destination location.

NEW QUESTION: 3

If a fire occurs in the FusionModule1000, the gas release indicator will display "DON'T ENTER WHILE RELEASING GAS"

- A. FALSE
- B. TRUE

Answer: B
