NEW QUESTION: 3

Your customer has three business units. The customer wants to share customer account addresses across these business units.

Which reference data set can be used to achieve this?

- A. Create a separate reference data set for each business unit and assign it to each unit.
- B. Assign a COMMON reference data set to the business units, which share the account addresses.
- C. Assign an enterprise reference data set to the business units, which share the account addresses.
- D. Create a new reference data set for account addresses and assign it to the business units.

Answer: B

Explanation:

Explanation/Reference:

Explanation:

A common reference data set is available as the default set, which can be assigned to several business units sharing the same reference data. For commonly used data such as currencies, you can use the common reference data set References:
