NEW QUESTION: 1

セキュリティの観点から、ネットワークでクロック同期プロトコルを使用することが重要なのはなぜですか？

- A. 従業員が勤務スケジュールを確実に順守するため
- B. インシデントに対応するときにイベントの正確なタイムラインを構築します
- C. スケジュールに従って更新がプッシュされることを保証する
- D. 誰もが現地時間を知るため

Answer: B

Explanation:

The Importance of Time Synchronization for Your Network In modern computer networks time synchronization is critical because every aspect of managing, securing, planning, and debugging a network involves determining when events happen. Time also provides the only frame of reference between all devices on the network. Without synchronized time, accurately correlating log files between these devices is difficult, even impossible. Following are just a few specific reasons: Tracking security breaches, network usage, or problems affecting a large number of components can be nearly impossible if timestamps in logs are inaccurate. Time is often the critical factor that allows an event on one network node to be mapped to a corresponding event on another. To reduce confusion in shared filesystems, it is important for the modification times to be consistent, regardless of what machine the filesystems are on.

NEW QUESTION: 2

Which of the following types of attacks is mounted with the objective of causing a negative impact on the performance of a computer or network?

- B. Option C

- C. Option D
 - D. Option A
- Answer: D**

NEW QUESTION: 4

Amazon Elastic File System (EFS) provides information about the space used for an object by using the `space_used` attribute of the Network File System Version 4.1 (NFSv4.1). The attribute includes the object's current metered data size and not the metadata size. Which of the following utilities will you use to measure the amount of disk that is used of a file?

- A. `blkid` utility
- B. `pydf` utility
- C. `sfdisk` utility
- D. `du` utility

Answer: D

Explanation:

Amazon EFS reports file system sizes and sizes of objects within a file system. Using the `NFSv4.1 space_used` attribute for measuring the space used for an object, it reports only the object's current metered data size and not the metadata size. There are two utilities available for measuring disk usage of a file, the `du` and `stat` utilities.
