NEW QUESTION: 2

A customer wants to deploy an AIX Program Temporary Fix (PTF) to their organization's AIX

endpoints. Which tool and option should be used to download the file?

- A. AIX Interim Fix Management Wizard with the Fileset option
- B. AIX Fileset Deployment Wizard with the Fileset option
- C. AIX Fileset Deployment Wizard with the Package option
- D. AIX Interim Fix Management Wizard with the Package option

Answer: B

NEW QUESTION: 3

You are a network administrator at ACME corporation where you have a pair of Cisco 5760 Wireless LAN Controllers deployed for HA AP SSO mode. A failover event occurs and the secondary Cisco 5760 controller moves into the active role. Which three statements about the failover event are true? (Choose three.)

- A. Upon guest anchor controller switchover, mobility tunnels stay active, Aps remain connected, clients rejoin at MA or MC, and clients are anchored on the new active controller.
- B. Switchover during AP preimage download causes the Aps start image download all over again from the new active controller.
- C. NetFlow records are already exported upon switchover and collection starts resuming in the new active controller.
- D. With SSO, wIPS information is already synced with the standby unit and this information need not be relearned upon switchover.
- E. Rogue Aps and clients are not synced to the standby and are relearned upon switchover.
- F. The new active controller does not need to relearn the shun list from IPS and other MCs, which eliminates the need to redistribute it to the MAs.

Answer: B,D,E
