NEW QUESTION: 1

A penetration test was performed by an on-staff technicians junior technician. During the test, the technician discovered the application could disclose an SQL table with user account and password information. Which of the following is the MOST effective way to notify management of this finding and its importance?

- A.** Document the findings with an executive summary, recommendations, and screenshots of the web application disclosure.
- B.** Notify the development team of the discovery and suggest that input validation be implemented on the web application's SQL query strings.
- C.** Connect to the SQL server using this information and change the password to one or two non-critical accounts to demonstrate a proof-of-concept to management.
- D.** Request that management create an RFP to begin a formal engagement with a professional penetration testing company.

Answer: C

NEW QUESTION: 2

While deciding on how the work of the project should be approached the following were considered.

Which statement is appropriate for inclusion in the project approach heading in the Project Brief?

- A.** The detailed designs (future process, systems, operating and organization models) will be based on the existing high-level designs.
- B.** New up-to-date software will be obtained to produce the graphical sections of the Project and Stage Plans.
- C.** The Project Manager will involve the selected service provider in the creation of the Stage Plan for stage 4.

Answer: A

NEW QUESTION: 3

A company is designing an application hosted in a single AWS Region serving end-users spread across the world. The company wants to provide the end-users low latency access to the application data.

Which of the following services will help fulfill this requirement?

- A.** Amazon Simple Storage Service (Amazon S3) transfer acceleration
Use AWS Local Zones to deploy workloads closer to your end-users for low-latency requirements. AWS Local Zones have their own connection to the internet and support AWS Direct Connect, so resources created in the Local Zone can serve local end-users with very low-latency communications.
- B.** Amazon CloudFront
- C.** AWS Direct Connect
- D.** Amazon Route 53 global DNS

Answer: C
