NEW QUESTION: 1

Refer to the exhibit.

Which two statements are true about the displayed STP state? (Choose two.)

- A. Port-channel 1 is flapping and the last flap occurred 1 minute and 17 seconds ago.
- B. The STP version configured on the switch is IEEE 802.1w.
- C. BPDUs with the TCN bit set are transmitted over port channel 1.
- D. The switch does not have PortFast configured on Gi0/15.

Answer: C,D

Explanation:

A port enabled with portfast will not send topology changes when a port goes up or down, but here we see that 296 TCN's were sent so we know that Gi 0/15 does not have portfast enabled. TCN's are sent using BPDU's over the root port, which we see is port channel 1.

NEW QUESTION: 2

どの2つのステートメントはOracle Managed Files (OMF)について正しいですか。

- A. OMFはREDOログ・ファイルおよびアーカイブ・ログ・ファイルの場所に影響することがあります。
- B. OMFは自動的に表スペースと制御ファイルの一意的なファイル名が作成されます。
- C. OMFはより良いファイル管理のために、ASMディスクグループだけでなく、RAWデバイスと一緒に使用することができます。
- D. OMFパラメータで指定されたファイルシステムの方向が自動的に作成されます。
- E. OMFは既にユーザーが指定した方向で作成したデータファイルを持つデータベースで使用することはできません。

Answer: A,B

Explanation:

D: The database internally uses standard file system interfaces to create and delete files as needed for the following database structures:

Tablespaces

Redo log files

Control files

Archived logs

Block change tracking files

Flashback logs
RMAN backups

Note:

*Using Oracle-managed files simplifies the administration of an Oracle Database. Oracle-managed files eliminate the need for you, the DBA, to directly manage the operating system files that make up an Oracle Database. With Oracle-managed files, you specify file system directories in which the database automatically creates, names, and manages files at the database object level. For example, you need only specify that you want to create a tablespace; you do not need to specify the name and path of the tablespace's datafile with the DATAFILE clause.
