### **NEW QUESTION: 1**

Renee is developing the Product Support Contact XPage. When a product manager enters the name of a support technician, the page is submitted and a lookup is done to try and populate the technician's e-mail address and phone number on the XPage. If there is no e-mail or phone number found, then messages should display to inform the product manager that the E-mail and Phone fields must be entered. On the XPages tab in the Application properties, the Client Validation check box is unchecked. What steps can Renee take to provide the needed validation messages on the XPage?

- A.** On the XPages tab in the Application properties, click to select Server-side Validation. Drag a Display Errors control from the core controls palette onto the XPage.
- B.** Drag a Server Validation control from the core controls palette onto the XPage and select the names of the fields needing validation.
- C.** On the XPages tab in the Application properties, click to select Client Validation. Drag a Display Errors control from the core controls palette onto the XPage.
- D.** Drag a Display Errors control from the core controls palette onto the XPage.

**Answer: D**

### **NEW QUESTION: 2**

The security administrator is implementing a malware storage system to archive all malware seen by the company into a central database.
