- B. There is only one option: purchase.
- C. There is only one option: subscription.
- D. There are two options: purchase and subscription

Answer: C

NEW QUESTION: 2

Refer to the exhibit.

If the traffic flowing from network 192.168.254.0 to 172.16.250.0 is unencrypted, which two actions must you take to enable encryption? (Choose two).

- A. Configure the ISAKMP policy names to match on R1 and R2.
- B. Configure the crypto map names to match on R1 and R2.
- C. Configure the transform-set on R2 to match the configuration on R1.
- D. Configure the crypto map on R2 to include the correct subnet.
- E. Configure the Diffie-Hellman keys used in the ISAKMP policies to be different on R1 and R2.

Answer: C,D

NEW QUESTION: 3

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details provided in a question apply only to that question.

You are a database administrator for an e-commerce company that runs an online store. The company has the databases described in the following table.

Each month, eight partner companies send your company comma-separated values (CSV) files that contain their sales data.

You need to create a Microsoft SQL Server Integration Services (SSIS) package to load the CSV files in parallel to a single table in DB2. You must minimize the number of transformation steps that are required.

What should you use?

- A. MERGE statement
- B. Merge Join transformation
- C. Foreach Loop container
- D. Sequential container
- E. Lookup transformation
- F. Balanced Data Distributor transformation
- G. Union All transformation
- H. Merge transformation

Answer: F

Explanation:

Explanation

The Balanced Data Distributor (BDD) transformation takes advantage of concurrent processing capability of modern CPUs. It distributes buffers of incoming rows uniformly across outputs on separate threads. By using separate threads for each output path, the BDD component improves the performance of an SSIS package on multi-core or multi-processor machines.
