NEW QUESTION: 1

Ann, the Chief Information Officer (CIO) of a company, sees cloud computing as a way to save money while providing valuable services. She is looking for a cost-effective solution to assist in capacity planning as well as visibility into the performance of the network. Which of the following cloud technologies should she look into?

- A. PaaS
- B. SaaS
- C. MaaS
- D. IaaS

Answer: C

Explanation:

Monitoring-as-a-service (MaaS) is a cloud delivery model that falls under anything as a service (XaaS). MaaS allows for the deployment of monitoring functionalities for several other services and applications within the cloud.

Incorrect Answers:

A. IaaS is when computer infrastructure, such as virtualization, is outsourced and clients pay for resources used.

C. SaaS is a software delivery method that offers remote access to software as a Web-based service.

D. It is when a computing platform is outsourced rather than a company or data center purchasing and managing their own hardware and software layers.
