A company implements Dynamics 365 for Finance and Operations for their Lean manufacturing environment.
There has been an engineering change to a fixed quantity product that is in production. This change will add an additional processing step as the second step. The existing version must be phased out and replaced by the new version.
You need to ensure that the engineering change takes affect at the end of the month.
Solution:
* Edit the existing production flow and set the expiration date to the end of the month.
* Using the existing production flow, create a production flow and version. Set the expiration date to the end of the month. Create an activity for the new process step and add it in the proper sequence.
* Create a Kanban rule that uses the last day of the month as the effective date.
* Edit the existing Kanban rule. Set the expiration date to the end of the month. Set the new Kanban rule as the replacement Kanban rule.
* Activate the new production flow.
